

The UCLA Dept. of Neurology
is conducting a research study called:
**Early-Onset Alzheimer's Disease Phenotypes:
Neuropsychology and Neural Networks**

We are investigating types of Alzheimer's disease that affect young people vs. older people and memory vs. other types of thinking (like language)

Eligible participants should have been diagnosed with Alzheimer's disease or frontotemporal dementia, not have any other medical problems, come with a study partner and be willing to commit to a one year follow-up.

Research Study Procedures

- 4 visits at UCLA at Year 1
- 3 visits at UCLA at Year 2
- MRI scan at Year 1
- Thinking tests and "brain tasks"
- Caregiver questions

- Participants will be compensated for their time and travel with:
 - \$25 Amazon.com gift card per visit
 - \$12 voucher for parking at UCLA Medical Plaza
- Participants may also keep a copy of their MRI scan
